to learn how you can help improve today’s urban environments and plan for the future.
Master’s degree in Sustainable Urban Planning
Achieve a deep understanding of cities and learn how to leverage that knowledge into forward-looking policy and action for metropolitan regions around the world. Study the theory and adaptation of cities using cutting-edge techniques and technology.

Including courses such as:
- Principles of Sustainable Urban Planning
- Urban and Environmental Economics
- Advanced Geospatial and Econometric Analysis
- Legal Frameworks
- Capstone

Graduate Certificate in Sustainable Urban Planning
Learn the fundamentals of urban planning with a keen focus on sustainability across economic, environmental, and social frameworks. Key areas of study include urban growth, land use, agricultural impact, and transportation engineering.

Including courses such as:
- Urban and Environmental Economics
- Transportation Planning in City Systems

Graduate Certificate in Sustainable Landscapes
Gain the sustainable design skill sets necessary to implement creative and environmentally-responsible solutions, while satisfying the complex rules and regulations surrounding issues such as stormwater management and urban agriculture.

Including courses such as:
- Sustainable Design Methods
- Native Plants
- Ecological Restoration

Graduate Certificate in Climate Change Management and Policy
Urban regions around the world face significant consequences as they adjust to rising temperatures and shifting weather patterns. Examine how cities will need to adapt, from energy production and usage to building methods and infrastructure.

Including courses such as:
- Planning Resilient and Low-carbon Cities
- Climate Change Economics
- Sustainable Energy for Cities and the Environment

Admissions requirements and required application materials are detailed on the website.
