Quick Reference

Please note the exact location of these buttons may be different on the Control Panel. Button configuration is not final at the time of this writing. The actual panel layout and buttons will be different from this illustration.

The Control Panel allows you to command all of the Audio-Visual equipment, without using various remote controls.
How to Use

The power button turns on the Video Projector.

Press the button for what you wish to display on the Video Projector. The red light indicates your choice.

VCR type buttons allow you to play, pause, fast forward and rewind VHS Tapes and DVDs.
Meaning of Indicators

Red lights indicate power or selection. No lights (not even Power) indicate a problem with the power source.

Quick Fix

Use the "Auto Image" button to correct any issue with the Control Panel or the Video Projector.
